EDUCATIONAL QUALIFICATION

Bachelor of Computer Application from Ravindra Nath Tagore University (Aisect), Indore

PROFESSIONAL SUMMARY

Experienced Mobile Application Developer and AI Engineer with over 12 years of expertise in iOS and Android development, including leadership roles in Agile environments. Proficient in Swift, SwiftUI, Kotlin, Objective-C, and scalable mobile architectures like MVVM and VIPER. Strong background in AI/ML integration using Python, FastAPI, LangChain, RAG architectures, and Vector Databases (e.g., Chroma, FAISS, Pinecone). Experienced in building enterprise-grade apps and AI-driven solutions across IoT, Healthcare, Telecom, EdTech, and Retail domains. Certified SAFe 6 Practitioner with a focus on performance optimization, system design, cross-functional collaboration, Data ML on Google Cloud, and Prompt Engineering.

TECHNICAL SKILLS

AI & ML Engineering	Python, FastAPI, LangChain, LlamaIndex, RAG (Retrieval-Augmented Generation), Vector Databases (Chroma, FAISS, Pinecone), Prompt Engineering, Google Cloud ML APIs
Languages	Python, Swift, SwiftUI, Kotlin, Objective-C, Core Java
Network Layer & APIs	FastAPI, RESTful APIs, GraphQL API, SOAP APIs, WebSockets, Retrofit, Alamofire, URLConnection
Reactive Frameworks	RxSwift, Combine
Libraries / Frameworks	Map, Location, Bluetooth, Third party Push notification, Image libraries, Material Designs, Third party SDK for IoT device communication, Siri Shortcuts, iOS/Android Widget, SwiftUI, CallKit
Architecture & Patterns	MVC, MVVM, MVP, VIPER, Clean Architecture, TCA. Design Patterns: Singleton, Decorator, Observer
Tools & Platforms	Xcode, Android Studio, Eclipse, Visual Studio Code. Platforms: iOS, Android
Databases	Vector DBs (Chroma, FAISS, Pinecone), SQLite, Core Data, Realm, DBFlow framework
Source Control & PM Tools	GitHub, SVN, Bitbucket, GitLab. PM Tools: Jira, Slack, Basecamp, Trello, Microsoft Teams
Payment Gateways	Apple IAP, Android IAP, PayU, PayPal, Stripe, CCAvenue, Braintree
AI Assistance & Dev Tools	Data Structures & Algorithms, GitHub Copilot, Claude AI, Google Gemini / AI Studio

CERTIFICATES & COURSES

- Certified SAFe (Scaled Agile Framework) 6 Practitioner 2025
- Prompt Engineering for Everyone (Cognitiveclass.ai)
- Prepare Data for ML APIs on Google Cloud Skill Badge By Google Cloud
- Python (Cognitiveclass.ai)
- GitHub Copilot

EXPERIENCE

12+ years of experience in Mobile Application Development & AI Engineering, over 20+ Mobile application development and deployment.
Over 10+ years of experience in iOS Development | Over 5+ years of experience in Android Development

Tech Lead / AI Engineer | Tech Mahindra, Pune — *April 2022 - Present*

- Lead developer and architect for mobile platforms and AI integration initiatives.
- Architected backend APIs using Python and FastAPI to serve intelligent recommendation and search features.
- Designed and deployed RAG (Retrieval-Augmented Generation) pipelines using LangChain and Vector Databases for contextual content retrieval.
- Architected framework for new device activation and SIM provisioning for a major Canadian telecom client.
- Delivered high-impact features using SwiftUI, Combine, GraphQL APIs, and AI workflows.
- Collaborated in Agile ceremonies including PI Planning, Grooming, Retrospectives, and GitHub Copilot KT sessions.
- Served as Delegate Lead, mentoring junior devs and leading technical discussions on mobile & AI architectures.

Tech Lead | Beyond Key, Indore — *Nov 2015 - March 2022*

- Progressed from Software Engineer to Mobile Tech Lead.
- Delivered cross-platform solutions in domains including IoT, Healthcare, Retail, Education.
- Led a team of mobile developers; responsible for architecture, code reviews, and CI/CD.
- Developed iOS and Android apps with advanced features like Bluetooth communication, geofencing, offline syncing, and calendar integration.

Software Engineer | Linkites, Indore — *Nov 2011 – March 2015*

- Developed 10+ mobile applications from scratch in multiple domains.
- Built custom ad frameworks, video/image processing apps, and music players.
- Key projects included event schedulers, social interaction platforms, and healthcare tools.

PROJECT HIGHLIGHTS

AI-Powered RAG Content Recommendation Engine

- Built a backend API service using Python and FastAPI integrated with LangChain and FAISS vector database.
- Implemented RAG workflows for efficient document indexing, chunking, and contextual semantic search/querying.
- Delivered fast RESTful endpoints consumed by mobile and web frontends.

iOS Tech Lead | TELECOM Industry

- Designed iOS framework for onboarding and device provisioning.

- Used SwiftUI, Combine, and GraphQL for real-time feature delivery.
- Code review, GitHub Copilot use case, Feature demo.

iOS Tech Lead | Internet of Things (IoT)
- Enabled Bluetooth & Wi-Fi configuration, firmware updates, and geofence triggers.
- Supported offline device logging and cloud sync via custom protocol.

NFC Maritime Attendance System
- Offline NFC-based check-in for cruise workers; syncs with central system post docking.
- Reduced manual entry by 80%; deployed in production fleet.

Software Engineer | Pocket Scheduler
- Sync school events and event scheduler.
- Architecture design and third party SDK integration.

Software Engineer | Retierly
- Involved extensively in development of iOS and Android applications.
- Implemented Tinder type swipe animation.
